**1/32 SCALE SBD-2 DAUNTLESS
MANUFACTURER : TRUMPETER
MODEL BUILT BY : SCOTT WELLER**

**KIT DESCRIPTION
AND
BUILDING NOTES**

This model was built out of the box. The model has some minor fit challenges with the wing/fuselage and tail/fuselage connection points. The fuselage halves which wrap around the area behind the engine firewall and the cowling also had some minor fit challenges. The level of detail in the cockpit is outstanding and everything fits together perfectly. The engine also has great detail as well and the landing gear. The model was painted in early World War II colors with Testors model master enamel paints.
